## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Raso et al. [US 4,939,492].

Raso et al. disclose a trip system for a circuit breaker having a calibration system comprising:

- a bias spring [36] for establishing a trip force;
- a tripping member [20] responsive to a magnetic flux across an air gap [figure 1] for overcoming the trip force and generating a trip displacement;
- means [52, column 3, lines 2-20] for adjusting the trip force in the absence of adjustment to the air gap; and
- means [54] for adjusting the air gap in the absence of adjustment to the trip force.

### ***Allowable Subject Matter***

Claims 1-4 and 9-11 are allowed.

Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cellerini et al. [US 3,949,331] and Salvati et al. [US 3,797,007].
